

My wife and I do a lot of travelling in our car. Our XM Satalitte Radio is invaluable for obtaining weather and road conditions that are accurate and up to date. Just last week while travelling in the Wyoming area, we were able to avoid a large delay due to snowstorms that were broadcast to us while we were still in Colorado.

XM Satalitte provided a service that was unavailable to us by any of the broadcast stations.

Please cast your vote to leave XM satalitte radio alone, it is an invaluable asset to us travellers
